About Peggy Liu

Peggy Liu, Chairperson of JUCCCE, has been at the heart of the greening of China since 2007. She has dedicated her life to personal and planetary health. Named the "Green Goddess of China" by Chinese press, she travels the world to consult companies and governments on how to catalyze societal-scale change, scale sustainable innovation, and collaborate with China.

Peggy's superpower is bringing people together across borders and industries to change the world for the better. Peggy works across policy, economic, technical, and spiritual realms.

Peggy <u>keynotes</u> around the world on lessons from how China is tackling the world's toughest challenges: pollution, urbanization, epidemics, drought, obesity and diabetes. What can other societies can learn without becoming China? How can individuals catalyze societal-scale change?

As the best-selling author of Mesmerize the Media: Maximize Your Impact With More Press, Peggy coaches women leaders on personal branding and transformational speaking. She brings about the rise of the Divine Feminine by strengthening the voices of women in the media.

Peggy is a <u>World Economic Forum Young Global Leader</u>. She was awarded the "Nobel" of climate change and the "Hillary Step". The Economist called her "one of the most innovative thinkers in Asia." Previously, she was a venture capitalist and founded one of the earliest ecommerce companies in Silicon Valley. Red Herring cover story dubbed her an "Internet Pioneer".

Peggy Led JUCCCE in These China-wide Changes

- Organized the MIT Forum on the Future of Energy in China from which JUCCCE was formed. This forum was the first public dialogue between US and Chinese government officials on clean energy in China, just as China was just starting to look seriously at greening itself.
- Introduced <u>Smart Grid to China</u> and catalyzed the revolution of electricity distribution to allow for renewable energies and energy efficiency at scale.
- Created the <u>China Dream</u> initiative in 2010 to reimagine prosperity for sustainable consumerism. This became China's national slogan. Environmental protection is now embedded into the national priority and identity of China.
- Educated 1000 Chinese government leaders (mayors and central government) on how to build sustainable cities. These trainings helped shape eco-city trends in China.
- Catalyzed China's change from incandescent lighting to energy efficient lighting, the largest leverage point in saving energy.
- Launched <u>Food Heroes</u>, teaching young kids and parents to eat in a way that is good for themselves and the planet.

Boards and Other Appointments

Peggy is a Distinguished Professor at China Academy of Governance, a lecturer at China Executive Leadership Academy of Pudong, and the National Academy for Mayors of China. She is a board member of Project Drawdown, an advisor to the FTSE Environmental Markets Committee, EAT Forum and Volans, a Governor of the Hillary Institute. She is a Thought Leader at Criticaleye CEO network. She served as an executive advisor to Marks & Spencer, an advisor to PWC China, a sustainability advisor to HP, a member of the World Economic Forum's Global Agenda Councils on Sustainable Consumption 2012-13 and on New Energy Architecture 2011-12, and an energy adviser to the Clinton Global Initiative in 2008. She is a recurring judge for The Circulars at Davos (circular economy) and the Hult Prize (social entrepreneurship at college level).

Prior to JUCCCE she was an early-stage venture capitalist in Shanghai. In the 1990's Peggy was recognized as an Internet pioneer on the cover of 'Red Herring Hits'. She headed Channel A, one of the earliest e-commerce companies in Silicon Valley. Other executive positions in Silicon Valley included General Manager of Consumer Applications at Zaplet, a dynamic email communications platform, and VP of Marketing at SeeUthere.com. Peggy also served as a management consultant at McKinsey (http://www.mckinsey.com/careers), a product manager for Internet Chameleon- the first Windows software that used a graphical user interface to surfing the Internet, a

product manager for Symantec C++ and Norton OEM products, and a programmer on ISDN modems at Codex Motorola.

Academics

She is a graduate of Massachusetts Institute of Technology (MIT) in Electrical Engineering and Computer Science and completed a program in Global Leadership and Public Policy for the 21st Century at the Harvard Kennedy School of Government and a program at the Lee Kwan Yew School of Public Policy at the National University of Singapore.
